

TRIDENT

ENVIRONMENTAL GROUP

Purveyors Of High Quality Environmental Solutions

A LEADER IN ENVIRONMENTAL SERVICES SINCE 1994

*We are dedicated to our mission of providing excellence in service and support to our clients.
Our mission is based on three principles which benefit our clients.*

OUR VISION:

We have a simple but powerful vision – Listening to our clients and understanding their particular needs. Listening and understanding are the foundations upon which we build our client rapport.

OUR PEOPLE:

Guided by our vision, we recognize that people come from different cultures and have various needs. One of our most important orientation strategies involves sharing our vision with our employees.

We encourage our people to achieve their full potential by: listening to and understanding our clients; taking responsibility for their decisions and using good judgment.

OUR QUALITY STANDARDS:

Our success has been built on quality standards. We strive for the most effective communication possible. This means collaborating with our clients to make major project decisions. Maintaining quality standards through out our collaboration enhances and builds our clients trust and results in quality solutions.

SERVICES

EMERGENCY RESPONSE

Trident Environmental Group LLC has the personnel and proven experience to provide rapid response for the accidental release of petroleum products and chemicals into the environment. Trident believes that the basis of any long term relationship is based trust and diligent work that reduces the cost of a spill, and will work quickly and safely towards closure for our clients.

All response personnel have extensive training in emergency response beginning with the federally mandated 40-Hour HAZWOPER training course. From project managers to field technicians, Trident personnel combine experience, knowledge and training to provide safe, effective and reliable coverage. Emergency response teams are on call 24 hours a day.

TANK SERVICES

Trident Environmental Group LLC offers a full range of services including the cleaning, decommissioning and the installation of above ground or under ground storage tanks. Whether it is for system maintenance, product conversion, or tank closure - all of our tank cleaning operations follow strict regulatory compliance and confined space entry requirements.

We fully comply with EPA and OSHA regulations - which assure a safe project for our workers and clients.

SITE REMEDIATION

Trident Environmental Group, LLC has conducted numerous remedial projects for soil, sediment, groundwater and surface water. Project sizes and magnitudes range from small container leakage to large, around the clock remedial operations requiring vast resources, personnel and equipment. All projects are implemented using the latest environmental technologies, proper environmental permitting, and health and safety standards.

Remedial services can include: site excavation, transportation and disposal; bio-remediation; soil vapor extraction and air sparging; Dewatering and groundwater treatment activities; and insitu chemical oxidation.

LIQUID BOOT "SUPERIOR PROTECTION AGAINST VAPOR INTRUSION"

Brownfield membrane/liner and vent system

- Cold, spray-applied membrane provides excellent sealing of penetrations
- Seamless, monolithic membrane; no mechanical fastening required
- Significant cost savings over conventional sheet membrane systems
- Functions well in larger industrial applications as well as smaller residential applications
- Rapid and simplified installation minimizes construction time
- Over 25 years of proven performance and successful installations of millions of square feet of the LIQUID BOOT® Brownfield Membrane/Liner System

WASTE CONSOLIDATION

Trident Environmental Group LLC recognizes that in today's environmentally conscious society, proper waste management is essential. Generators can feel secure in knowing that Trident can assist your organization with the intricate web of waste regulations, as well as the hands on handling, packaging and removal of hazardous and solid wastes at their sites. Trident lab pack chemists segregate waste according to chemical compatibility, package and ship by DOT regulations. Our goal is a balance between compliance, cost and liability reduction.

- SEGREGATION AND PACKAGING OF LAB CHEMICALS
- DISPOSAL OF BULK SOLIDS AND LIQUIDS
- DRUM CONSOLIDATION AND DISPOSAL
- CYLINDER IDENTIFICATION AND HANDLING
- PCB EQUIPMENT AND OILS
- SLUDGE REMOVAL
- FLUORESCENT LAMPS, BATTERIES AND LIGHT BALLASTS
- WASTE MINIMIZATION AND MANAGEMENT

Please give us a call to discuss your requirements, ask questions or arrange for an on site visit.
